Art Unit: 3724

1. Claims 23,24,29 and 30 are objected to because of the following informalities:

The term "knives" lacks proper antecedent basis. These elements were previously referred to as "cutting means".

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 19,25-28 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Bitzel '211, who shows a method of cutting planiform pieces that could be used as automobile trim.

Bitzel shows several tool species that meet the claims. For example, the punch tool of figure 16 has a first cutting means (s3) that cuts an arcuate apex as seen in the upper right part of figure 16 and also a straight section. Also shown is a second cutting means (immediately above s3) that has a straight edge and overlaps the first cutting means. There is also a third cutting means (s2) for cutting another straight portion that overlaps slightly with the first cutting means.

In regards to claim 28, the support portion is best seen in figure 1.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/019,992 Page 3

Art Unit: 3724

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 19-22,25-28,31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bitzel '211 in view of Fazis '273.

Bitzel shows a cutting method with all of the recited steps (as set forth above) except the first cutting means has only one straight side, not two. However, Bitzel makes it perfectly clear that the charm of his device is its versatility, and that one should be swapping a myriad of tool shapes (lines 56,57, column 7, also line 65, column 9, also lines 38,39, column 12).

Given Bitzel's suggestion to employ a wide variety of tool shapes, it would have been obvious to one of ordinary skill in the art to have included tool shapes such as Fazi's, who teaches a rounded corner with two straight sides (figure 2a), and to have employed it in conjunction with straight edged tools, as taught by both Bitzel and Fazis, in order to effectively cut rounded corners.

In regards to claims 22 and 28, the support portion is best seen in figure 1.

- 6. Claims 23,24,29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/019,992 Page 4

Art Unit: 3724

Applicant has overcome the rejection under 35 USC 112.

Applicant has overcome the rejection by Fazis under 35 USC 102.

Applicant's arguments against Bitzel are moot, since Examiner is now relying on a different embodiment from Bitzel.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 571-272-

4512. The examiner can normally be reached Mon-Thurs, 7:30AM-5PM

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
